-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garrison US 6,336,114 in view of Brown "Using Netscape 2".**

As per claims 1, 6, 11, 14, 15, 19, 20, 24 and 25, Garrison discloses a Client with a processor (DSP) and memory (disk) coupled to a local network (network interface), (Col 3 lines 53-65). Garrison discloses logic to input a password associated with a user, (Col 4 lines 28, 29, Col 5 lines 4-8). Garrison discloses logic to authenticate the password, (Col 6 lines 3-18).

Garrison does not disclose a FROM field.

Brown discloses authenticating a user with a password, (Pg 226 paragraph 1)

Brown discloses obtaining a from field identifier, and locking the from field identifier into a from field associated with data transmission, (Ray Gronberg gornberg@nando.net) associated with the user, (page 342 figure 13.13).

It would be obvious to one of ordinary skill in the art to combine Garrison with Brown because the authentication method of Garrison makes the email of Brown more secure.

As per claims 2, 7, and 12, Garrison discloses logic to input a username, (Col 5 lines 4-8).

As per claims 3, and 8, Garrison does not disclose a from field.

Art Unit: 2134

Brown discloses a from field with the name of the user, (Ray Gronberg), (page 342 figure 13.13).

As per claims 4, and 9, Garrison does not disclose a from field.

Brown discloses a from field with an electronic mail address associated with the user, (gornberg@nando.net), (page 342 figure 13.13).

As per claims 5, 10, and 13, Garrison discloses logic to encrypt the password, (Col 5 lines 20-23). Garrison discloses logic to authenticate the user and password, (Col 6 lines 3-18). Garrison does not disclose a from field.

Brown discloses a from field, (Figure 13.13).

As per claims 16, 21, and 26, Garrison discloses authentication requires decryption of the password, (Col 6 lines 3-10).

Claims 17, 22, and 27 rejected under 35 U.S.C. 103(a) as being unpatentable over Garrison US 6,336,114 in view of Brown "Using Netscape 2" in view of Misra US 5,742,769

As per claims 17, 22, and 27, Garrison-Brown does not disclose a domain controller.

Misra discloses using a domain controller to verify a password (authenticate), (Col 4 lines 45-65).

It would be obvious to one skilled in the art to combine Garrison-Brown with Misra because the authentication service increases security.

Claims 18, 23, and 28 rejected under 35 U.S.C. 103(a) as being unpatentable over Garrison US 6,336,114 in view of Brown "Using Netscape 2" in view of Lee US 5,742,769.

Art Unit: 2134

As per claims 18, 23, and 28, the Garrison Brown combination does not disclose requesting the From field from a server.

Langford discloses requesting the from field from a server, (Col 7 lines 35-50).

It would be obvious to one skilled in the art to combine Garrison-Brown with Lee, because a remote server allows email access from anywhere.
